- **Beta** - Works but rough edges
- **Preview** - Pipeline CRUD / demo only
- **Scaffold** - Placeholder or stub

Bottom Line

You have built a multi-vertical business OS - not a single SaaS category. A comparable best-of-breed stack runs ~\$1,850-\$3,200/mo for a growing team; DG Professional + industry (\$348) or Business + all Pro apps (\$874) undercuts that by 53-76% on software alone. Growth Systems at \$497+ adds agency delivery where HubSpot Professional alone is ~\$1,380/mo before implementation.

Sell today: Platform tiers, Pro add-ons, Real Estate + Accommodation industry apps, Growth Systems. **Do not oversell:** Owner Portal, Creator Studio, Finance/Services/Auto/Commercial depth.
